

# SPECIFICATIONS

**ARTICLE**

Designation : **Board for derinding**

Code bobet : **70095**

Selling Unit : **Unit**

*Non-contractual pictures*

**CHARACTERISTICS**

- Material: Polyethylene HD 500
- White color
- Overall length: 400 mm
- Overall depth: 330 mm
- Overall height: 120 mm
- Weight: 5.4 kg
- Assembly by stainless steel screws
- With two angles 50 mm thick on the top and 50 mm thick return on the bottom

**POLYETHYLENE CHARACTERISTICS**

Polyethylene is insensitive to attacks from most acids, alkaline solutions, many solvents organic materials and hot water, thanks to its good chemical resistance. It is a good electrical insulator and can be welded quickly.

- Density (g/cm<sup>3</sup>): 0.96
- Storage temperature: -60°C to +80°C
- Strength (N/mm<sup>2</sup>): 27
- Elongation at break: >500%
- Shore hardness (Shore D): 63
- Very low water absorption
- Soft surface (low stiffness)
- Not HF weldable
