Broth thermometer

Thermometer for food industries including :

- Glass body
- Sterilizable food safe white polypropylene sheath
- Integrated suspension ring
- Red alcohol

- Superior part : D.20 mm - W.220 mm
- Length : 290 mm
- Immersion rod : D.8 / 9 mm - W.70 mm
- Partial immersion : 70 mm
- Graduated : -10 / +120 °C
- Division : 1 °C

Like any measuring instrument, the precision is maximum in the central zone of the scale. If you must use it in one of the temperature extremes of the scale, find another thermometer whose temperature range better suits your use.

The protective sheath can be sterilized at 100 °C. The complete sheath thermometer supports washing in the dishwasher.
