**CHARACTERISTICS**

Candy thermometer

Thermometer for food industries including :

- Glass body
- Food safe grey polyamide or stainless steel sheath
- Sterilizable in the dish washer
- Red alcohol

- Partial immersion : +/-70 mm
- Length : +/- 290 mm
- Graduated : +80 / +200°C
- Division : 1°C

As any other measuring instrument, the maximum precision is in the middle of the scale. If you have to use it in scale extreme temperatures, use another thermometer which is better for your use.

The protective sheath can be sterilized at 100°C. The complete thermometer with sheath is dishwasher safe (except the type FRIGO).
