ARTICLE

Designation : **Cyano 6 glue**

Code bobet : **21983**

Selling Unit : **Unit**

Non-contractual pictures

**CHARACTERISTICS**

- Quick-setting cyanoacrylate adhesive on elastomers and plastics
- Suitable for bonding plastic, elastomer, rubber surfaces
- Registered by NSF in category P1 under number 161395 (usable in food industries without contact with food)
- Excellent resistance to aging
- Soft bottle, needle cap for precise and easy application, 20 g
- Without allergens

- Density: 1.06
- Chemical nature: Ethylester
- Setting time on:
 - * Metal (steel): 18-28 seconds
 - * Plastic (ABS): 2-4 seconds
 - * Elastomer (EPMD): 1-3 seconds
 - * Wood (beech): >60 seconds
- Tensile strength: material failure at 66 N/cm².
- Shear strength: 11-20 n/mm²
- Temperature range: -50 to +95°C

DESCRIPTION :

Appearance : Colourless

Viscosity : 12-18 mPa.s at 25°C

Flashpoint : 85°C

RECOMMENDED STORAGE / APPLICATION :

- For best performance, surfaces must be clean and grease-free
- Efficient on relatively small parts to be assembled
- Apply a thin layer by pressing lightly on the bottle
- Let stand a few seconds depending on the support
- Use By Date: 12 months in unopened original packaging
- Store away from light, moisture and excessive temperatures
