Designation : Cyanolit glue

Code bobet : 3477 : green

Selling Unit : Unit

CHARACTERISTICS

- Cyanoacrylate glue, very fluid, ethyl based
- 100% reactive glue, solvent free, not toxic
- Bonding by infiltration
- Very liquid, colourless
- Supplied in 2g tube

BENEFITS :

The chemical nature of the stabilizer put into these adhesive enables to get setting time less dependant of relative humidity and of acidity of surfaces to put together.

- Better resistance to temperature, to thermal shocks, to weather and humidity
- Greater flexibility of the stuck seal and high resistance to peel
- Better preservation
- Less irritating odours
- Less white streaks

DESCRIPTION :

Appearance : liquide incolore

Viscosity : 2mPa.s

Monomer density : 1.05 g/cm³

Flashpoint : 83°C

: 1.48

Polymer density : 1.2483 g/cm³

Dielectric constant : 3.4 (à 10 kHz)

Volume Resistivity : 8,46.10¹² Ohm/cm

RECOMMENDED STORAGE / APPLICATION :

- Instant drying : 2 to 5 seconds
- Suits for : china, earthenware, ceramics, ivory.
- Do not suit for glass.
