Designation : **Food grease**

Code bobet :

3497 : 1 kg

3787 : 5 kg

Selling Unit : **Unit**

CHARACTERISTICS

TRANSLUCENT WHITE FOOD GREASE

Grease NLGI 2 grade, especially designed for food industries and their packing materials.

- Type of soap : Bentone
- Appearance : Smooth, ropy
- Working temperature : -15°C to +120°C

Avoids the risk of toxicity in case of incidental contact: between grease and foodstuffs, between foodstuffs and packings

Can be used, for example, to lubricate bearings and joints located in the immediate environment of the products :

- Harvesting machines, equipment used in industry to manufacture and package the wine, beer, mineral water ...
- Manufacture of food made of flour, including bread, biscuits ...
- Industrial meat, fish, vegetables, fruits ...
- Dairy products

BENEFITS

- No toxic contamination, cleanliness
- High mechanical and thermal stability (without drop) up to 150°C
- High adhesiveness for a better lubrication and a reduced consumption

PERFORMANCE / FOOD SAFETY

- NSF H1 (n°127 942) approved for incidental contacts with foodstuffs
- Its mineral oil is extremely refined and in compliance with french pharmacopoeias
- Its constituents are in compliance with the guide established in 1992 by the CNERNA

HEALTH, SAFETY AND ENVIRONMENT

Product shelf life: 1 year in closed and protected packaging

The elimination must be made in compliance with the regulations relative to rejection of used lubricants.
