Screw-on rubber feet prevent slippage due to vibrations.

THE MAIN ADVANTAGES :

The advantage of grinding with disks lies in the ability to adjust the disks to the form of the work piece and at the same time to provide sufficient ventilation while grinding. This guarantees the desired grinding result: the "convex cut". Whetting is done with a felt polishing disk.

APPLICATION :

Cutting companies, small and medium sized companies in the meat industry, as well as food and gastronomy companies.
