Designation : **Grinding sharpener ELER N250**

Code bobet : **8278**

Selling Unit : **Unit**

Non-contractual pictures

**CHARACTERISTICS**

- Electric grinding sharpener, simple and comfortable manufacturing, fit with a natural stone.
- Professional machine with aluminum water container and draining plug.
- Stainless steel case and driving by serrated belt
- Waterproof switch

THE MAIN ADVANTAGES :

- Precise sharpening with adjustable tool holder
- Non-slip base, the grindstone remains steady
- Easy emptying
- The rotational speed of the sandstone avoid water spitting and all risks of accidents
- The grain fineness provides a precise sharpening. The quality of the cut surface is maximum, no need to force on the knife, the risks of serious injury are limited. The knife is less wear and so has to be changed less often.
- A well sharpened knife means time saving.

TECHNICAL CHARACTERISTICS :

- Voltage : 230 V single-phase - 130 W
- Rotational speed : 1500 rpm
- Motor protection IP44
- Stone diameter 250 mm and thickness 60 mm - 100 rpm
- Materials : stainless steel, aluminum and sandstone of the Vosges
- Weight : 14 kg

APPLICATION :

- Laboratories, kitchen, butchery, delicatessen, fishery...

SPARE PARTS :

Refill sandstone : code Bobet 8827

INSTRUCTIONS FOR USE :

- To use with water

STORAGE / MAINTENANCE :

- Dry storage
- The container should be clean, remove sand and water after each use

- The stone should be dry and should not remain in water

STANDARDS :

In compliance with the EC directives 2006/42 EC
