Designation : **HYCRON® 27602 glove**

Code bobet : **780 : S.10**

Selling Unit : **pair**

Non-contractual pictures

CHARACTERISTICS

- Full coated, nitrile, cotton jersey, knitwrist
- Length : (10) 260 mm.
- A big tough glove for a rough, tough life: three times more durable than heavy-duty leather.
- Stronger and more flexible than PVC : coating provides excellent barrier to oil, greases and dirtiness.
- Unique Ansell nitrile formulation : offers superior resistance to sharp and abrasive materials.
- Soft jersey liner : cushioning and protection for the hand.
- Seamless on contact areas : comfortable for the users and reduces wear and tear.
- Anatomic fingers shape : specially designed for free handling.
- Excellent dry grip : easier and safer handling.
- Made without silicone : Guaranteed clean for metals and motor manufacture.
- Machine washable : hygienic and increased durability.

APPLICATIONS :

Construction materials, rough timber (steel bars, sheet metals, cans and other metal products...), plywood, cold plastic mouldings, heavy-duty cables, rough castings and cores, street cleaning and refuse collection

RECOMMENDED STORAGE / APPLICATION :

- Keep out of direct sunlight, store in a cool and dry place and keep away from sources of ozone or ignition.
- Do not use against flames or temperatures < - 25°C or > 160°C.
- Do not use for chemical protection : the glove is not liquidproof.

STANDARDS :

Complies with EU regulation 2016/425 relating to category II personal protective equipment

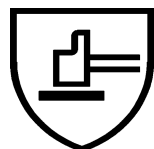

Complies with European standards

-General requirements: EN ISO 21420: 2020

-Mechanical resistance: EN 388:2016 + A1:2018 4121B

EN ISO 21420 :
2020 Cat.II
