ARTICLEDesignation : **Knife blade tester**Code bobet : **15127**Selling Unit : **Unit****CHARACTERISTICS**

- Plastic
- Length 9.5 cm
- Hole : diameter 0.90 x height 2 cm

The tester checks if the blade of a knife is still broad enough to avoid sticking through a safety mesh glove.

If when inserting the blade in the hole of the tester, this blade comes through the hole, it means that it is too worn, and the knife have to be thrown away.

Indeed, this blade becomes too dangerous as it could come through a glove or a chain mail apron.
