**CHARACTERISTICS**

SPRAYER IDEAL FOR ACID BASES

- Tank in injected polypropylene, translucent white, graduated, useful capacity 5L and total capacity 7L
- Integrated bottom dosing (graduations 250ml and 500ml)
- Wide opening (easier filling, blending and emptying)
- Safety valve with VITON seam, tared at 3 bars, integrated to the pump for more safety against shocks
- Pump with ergonomic handle, polypropylene rod, fit with a "CUP" VITON seam
- Reinforced PVC piping, translucent, high resistance
- Professional lance handle with integrated filter, fit with VITON seams
- Spray lance in composite fiber (chemical and mechanical resistance) 40 cm
- Support, carrying and maintenance knob for pressurizing
- Fabric shoulder strap for carrying over the shoulder

Fit with :

- a polypropylene nozzle holder, universal, adjustable with VITON seals
- a turbulence nozzle
- an orange flat spray nozzle

BENEFITS FOR THE USERS :

- Wide top opening (9 cm) for easier filling
- Total emptying without any retention area
- Comfort of use thanks to the knob which eases the pumping
