**CHARACTERISTICS**

LOW PRESSURE GUN SPECIAL FOR FOOD INDUSTRY

- Polypropylene reinforced with glass fiber body covered with a blue plastic shell resistant to shocks and stains + 3 protections in blue silicon
- Jet adjustment by the trigger stroke, from straight jet to fan jet
- Designed to prevent dirt retention
- Ergonomic and robust construction
- Minimum opening effort with ergonomic and well-balanced trigger. Trigger protection bar
- Nickel plated brass swivel coupling
- Maximum working temperature 50°C
- Supply 1/2"F (15x21)
- Viton seal
- Maximum pressure : 12 bars
- Maximum flow : 50 l/min
- Weight : 460 g

DESCRIPTION :

- Very light, ergonomic and robust, does not tire the user
- Equipped with a swivel coupling at the entrance, the wrist retains full freedom of movement to direct the jet to the most difficult places to reach
- Fully streamlined, it prevents impurities from becoming embedded and protects the user from heat in case of a hot water supply
- The handguard prevents accidental triggering

APPLICATION :

Specifically designed for extended use in agrifood environments and all industries that require daily washes. Also ideal for community kitchen washing, restaurants, and wherever a daily wash is needed.
